Thank you for taking part in our recruitment process for the **Frontend Internship Program** at Corner Case Technologies. An exciting journey is ahead of you!

We have a small task for you that shouldn't take longer than 3-4 hours to complete, and we hope you will enjoy the process as much as we do :)

Below you will find several links to Figma - a web-based design tool with real-time collaboration.

Designs:
https://www.figma.com/file/ooya7hVTx4BvdwQQFPXZcj/CCT-Lab-task

Prototype: https://www.figma.com/proto/ooya7hVTx4BvdwQQFPXZcj/CCT-Lab-task?node-id=5%3A711&scaling=min-zoom&page-id=0%3A1&starting-point-node-id=5%3A509

Your goal is to using design files achieve the result as displayed in prototype, applying the following requirements:

- Project README.md must be created with instructions
- Solution should be uploaded to version control
- Solution should be built using React.js framework

Extras and hints:
- TypeScript or Proptypes (TypeScript would be much more appreciable).
- CSS modules or Styled Components (You can use any preferred React UI library)
- Pay attention to code quality, formatting, conventions etc.
- Use images from provided designs
- Transition/motion smoothness would be appreciated (not required).

Once completed, please send us a link to your GitHub **no later than 15 November, 2021.**
